## Experience

**CPP Investments** Toronto, ON
*Software Engineer - Enterprise Systems (Legal)* *Oct 2025 – Present*

- Led end-to-end development of a new pre-trade compliance platform using **React**, **TypeScript**, **Python**, **FastAPI** and **SQL**, serving **30+** analysts to enforce trading restrictions and ensure regulatory compliance.
- Built data pipelines using **Apache Airflow** to integrate internal systems and SaaS vendors, to automate legal and compliance workflows saving **20+** hours/week of manual effort.
- Built CI/CD pipelines using **GitHub Actions**, **Docker**, and **ArgoCD** to deploy applications to Kubernetes environments.
- Partnered with technical and business stakeholders to gather requirements, run demos, and iterate on compliance workflows.

**CPP Investments** Toronto, ON
*Senior Intern Engineer - Enterprise Systems (Finance)* *Sep 2024 – Dec 2024*

- Built Data pipelines to integrate internal systems with a third-party financial tool using **Terraform** , **CI/CD pipelines** and **Apache Airflow**, reducing manual processing errors by over **30%** in valuation workflows.
- Created a **Python** library to centralize reusable functions within the Enterprise Systems team and reduce development time.
- Coordinated with Valuations, Risk, and Credit Investment teams to deliver a centralized valuation platform for **100+** finance professionals, replacing manual workflows with automated pipelines.

**Dash Social** Halifax, NS
*Software Engineer Intern - Creators Team* *Jan 2024 – Apr 2024*

- Built features for creator management using **Vue.js, JavaScript, HTML, CSS, Flask, and SQL**, contributing to the acquisition of clients generating $500K+ in revenue.
- Built **Kafka** producers/consumers and **Celery** tasks for inter-service communication supporting Dash Social's new platform for Creator Management.
- Reduced error rates across multiple endpoints through the use of **Datadog & Mixpanel** to leading to less client churn.

**NorthBay Solutions** Halifax, NS
*Junior Software Engineer (Co-op)* *May 2023 - Aug 2023*

- Built a full-stack SEC filings Web App with **React, CSS, .NET (C#)** streamlining investment research workflows.
- Developed a web scraper for SEC filings ingestion using **Python**, **AWS RDS**, and **Git** automating the collection of fillings for multiple investment firms.
- Designed a scalable data lake using **Apache Spark, AWS and Snowflake** to support data analysis on mobile game usage.

## Technical Skills

**Languages & Frameworks:** Python, TypeScript, Go, React, React Native, Next.js, Node.js, Flask, FastAPI, Java, SQL

**Tools & Platforms:** Git, AWS, Azure, Docker, Kubernetes, Terraform, Apache Airflow, Apache Kafka, Datadog, ArgoCD

## Projects

**Vayro App** Repository
*Tech Stack: React Native, TypeScript, Firebase, OpenAI SDK, Gemini, Google Maps API, Git*

- Built a marketplace that uses generative AI to reduce friction in pricing and selling household items by enabling real-time valuation estimates and listing support.

**VendorLens AI** Repository
*Tech Stack: Next.js, TypeScript, Supabase, Gemini API, Slack API, Git*

- Built an AI-powered vendor management platform that centralizes software spend, extracts contract terms, tracks renewals, and identifies duplicate tools and consolidation savings.

## Education

**Bachelor of Computer Science, Minor in Economics** Sep 2021 - Aug 2025
*Dalhousie University* *GPA: 3.94/4.0*

**Relevant Courses**: Software Engineering, Operating Systems, Algorithms I, Adv. Web Services, Systems Programming

**Awards**: Future Tech Leaders award, Faculty Leadership (Computer Science) Award

## Leadership & Affiliations

**Vice President External** Halifax, NS
*Dalhousie Computer Science Society* *May. 2024 - May 2025*
